

# 透過「電子健康記錄合規服務供應商」計劃參與裝置臨床醫療管理系統的擴展系統 Deploy CMS Extension Systems through eHR CSP Scheme

## eHR Compliant Service Provider (CSP) Scheme Framework

# Background

## 2nd Stage EEI Partnership Model

- To deploy CMS On-ramp to the private healthcare sector through '*eHR CSP*' scheme

## Purposes

- To facilitate the adoption of electronic medical/patient record system in the private healthcare sector
- To encourage provision of add-on and innovative services that suit the healthcare sector
- To provide business opportunities for the IT sector

# Clinical Management System (CMS)

## On-ramp

- Open-source clinic management system supporting clinical workflow at private clinic settings
- Sharing and interoperability capability with eHR Sharing System
- Need to install a communication module (ELSA) locally to connect to the eHR Sharing System

# CSP Scheme Not Applied to CMS Adaptation for Private Hospitals

- Different IT settings of private hospitals
- Deployed by the IT departments of private hospitals or their appointed IT vendors

# Guiding Principles for the Framework

- Simple, easy to administer
- Company-based registration
- Accept registration throughout the year
- Eligible CSP undertake to meet terms and conditions covering security and legal compliance, proper deployment procedures, etc.
- Trained staff have to attend refresher course

# Workflow for Participation in CSP Scheme

## **(1) Compliance Criteria (company-based)**

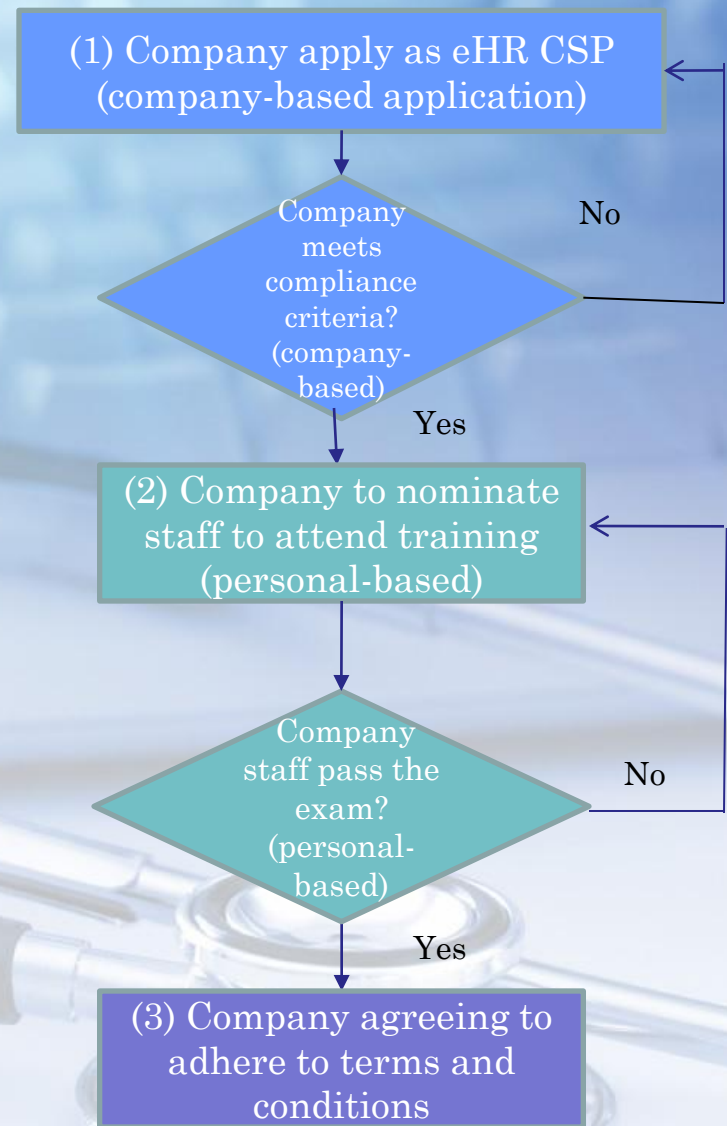

- Valid Business Registration
- Relevant Healthcare Services Capabilities and Project Experience in IT Projects
- IT Expertise and Security Compliance
- Sufficient no. of employee (at least three) attend and pass the exam

## **(2) CSP Training and Exam (personal-based)**

- Staff should pass the exam after basic and advanced training

## **(3) Eligible CSP**

- Agree to adhere to terms and conditions on security and legal compliance, proper deployment procedures, etc.
